

X13 SuperBlade®

Ultra High-Density Multi-Node Systems for Enterprise, Cloud, HPC, and AI Applications

Optimized for Performance, Density and Advanced Networking

- Up to 20 nodes in 8U or 10 nodes in 6U with integrated switches
- Single or dual 5th/4th Gen Intel® Xeon® Scalable processors with air-cooled support for up to 350W TDP CPUs
- Optional liquid cooling available
- Up to 32 DIMM slots per node supporting DDR5-5600MHz
- High-performance networking with 400G/200G InfiniBand and 100G/25G Ethernet support
- Up to 4 GPUs per node in a high-density, balanced architecture
- High-performance NVMe support in E3.S, E1.S, U.2 and M.2 form factors

Resource-Saving Architecture

Supermicro's high-performance, density-optimized, and energy-efficient X13 SuperBlade can significantly reduce initial capital and operational expenses for many organizations. SuperBlade utilizes shared, redundant components, including cooling, networking, power and chassis management, to deliver the compute performance of an entire server rack in a much smaller physical footprint. These systems support GPU-enabled blades and are optimized for AI, Data Analytics, HPC, Cloud, and Enterprise workloads. Inside, Supermicro's Resource Saving Architecture reduces cabling by up to 95% compared to industry standard servers to lower costs and power consumption.

Built for High-Density, High-Performance Computing

SuperBlade is one of the most versatile HPC solutions available, with a range of CPU, storage and networking configurations which can be customized for specific workloads. For accelerated computing requirements, PCIe GPU cards can also be installed, with up to 2 FHFL cards in double-width blades. SuperBlade powers some of the world's most complex and powerful HPC clusters and can be used for AI, machine learning, hybrid cloud, health sciences and financial applications.

Maximum Compute Density

With up to 20 nodes in an 8U chassis and both air and liquid cooling options available, SuperBlade® systems can be configured to maximize density and performance for a range of installation environments. In its maximum configuration of 20 single-width blades in an 8U enclosure, each node occupies just 0.4U of rack space, delivering unprecedented compute density. The 6U SuperBlade® features a disaggregated design between the motherboard and I/O module, where each resource can be refreshed independently, allowing data centers to reduce refresh cycle costs and reuse components to reduce Total Cost to the Environment (TCE).

Optional Liquid Cooling for Enhanced Efficiency

SuperBlade's highly efficient shared cooling system supports free-air-cooling for CPUs up to 350W for single processor or double-width blade configurations. For even greater compute densities, dual-processor and single-width blade configurations can support the same 350W TDPs thanks to optional direct-to-chip liquid cooling. The use of liquid cooling in data centers not only allows components to run at higher performance levels, but also reduces the need for Computer Room Air Conditioning (CRAC) units and improves overall efficiency, lowering OPEX, TCO and TCE.

Powered by 5th Gen Intel® Xeon® Scalable Processors

SuperBlade's high density design can fit up to forty 5th/4th Gen Intel Xeon Scalable processors and 2,560 cores into an 8U rackmount chassis, delivering unprecedented compute power in a minimal physical footprint. Efficiency and performance are

further improved by built-in Intel QuickAssist Technology (Intel QAT), which offloads common cryptography, compression/decompression and hash/public key algorithms to free up CPU instances for more important compute workloads.

Enclosure	SBE-820 Series	SBE-610 Series
Blade Support	Up to 20 hot-swap, half-height, single-width blade servers Up to 10 hot-swap, half-height, double-width blade servers Mixed configuration supported	Up to 10 hot-swap, single-width blade servers Up to 5 hot-swap, double-width blade servers Mixed configuration supported
LED Indicator	Power LED, Fault LED	Power LED, Fault LED
Infiniband Switch	SBE-820H/H2 only: Single 200G HDR InfiniBand switch SBE-820C only: Single 100G EDR InfiniBand switch	N/A
Ethernet Switch/Pass-Through Module	SBE-820C/H/H2 only: Up to 2 hot-swap 25G Ethernet switches or pass-thru modules SBE-820J/J2 only: Up to 4 hot-swap 25G Ethernet switches or pass-thru modules SBE-820L only: Up to 2 hot-swap 10G Ethernet switches or pass-thru modules	Up to 4 hot-swap 25G Ethernet switches, 10G Ethernet switches or pass-thru modules
Chassis Management Module (CMM)	Single/Redundant CMM for remote system management with software SBE-820J/J2 only: Up to 2 hot-swap CMMs for remote system management with software	Up to 2 hot-swap CMMs for remote system management with software
Models	SBE-820C/J/J2/L/H-822: Up to 8 hot-swap 2200W Titanium (96% efficiency) power supplies SBE-820H2/J2-830: Up to 8 hot-swap 3000W Titanium (96% efficiency) power supplies	SBE-610J/610J2-822: Up to 8 hot-swap 2200W Titanium (96% efficiency) power supplies SBE-610J2-830: Up to 8 hot-swap 3000W Titanium (96% efficiency)
